

## Knowledge grows

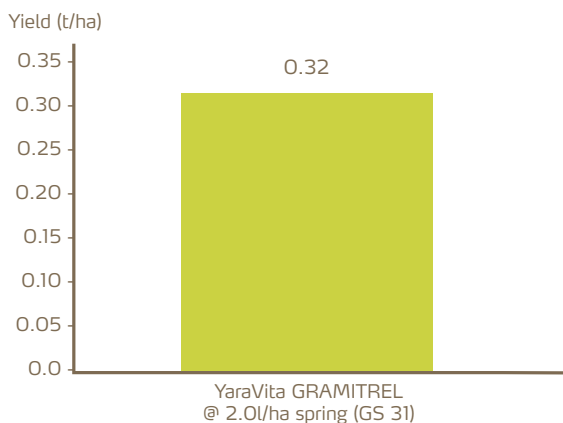

# Maximise momentum throughout the spring by applying YaraVita GRAMITREL

### YaraVita GRAMITREL

- Consistent yield response from spring applications
- Trials from 2015-2019 show a yield benefit across all treatments
- The best returns from the spring applications came from 2 l/ha @ T1 (GS 30/31)
- Spring YaraVita GRAMITREL supplies the key micronutrients to meet the nutrient demands during this rapid growth and development phase
- A crop specific product that brings simplicity and compatibility to your spring workload

**Yield response in winter wheat following a spring application of YaraVita GRAMITREL at 2.0l/ha (Yara trials, 2015 - 2019)**

***This is an 4:1 return on investment!***

At stem extension (GS31) - apply YaraVita Gramitrel @ 2 l/ha for improved yields and a healthy crop
