

Ensure an even spread and Grow The Future with YaraBela AXAN

Did you know?

Fertilizer comes in all shapes, sizes and densities

Nutrient segregation can occur when spreading a blended fertilizer

Spreader calibration with blends is a compromise

Can you afford not to use quality fertilizer?

Even crops, lower lodging risk and faster harvesting

Increased yield

Wide spreading saves time

Small changes can make a big difference

Change to a complex compound fertilizer to ensure even spread of all nutrients

Up to 6.5 X the number of landing sites with complex compound fertilizers

Achieve a CV of less than 10%

Grow the future with Yara

Knowledge grows
